| Abrasive for lapping jig bushings.....                  | 81       |
| Adjustable bevel-gear fixture.....                      | 313      |
| Adjustable boring jigs.....                             | 198      |
| Adjustable fixtures, for«bronze worm-gear sector.....   | 256      |
| for special bevel-gear blanks.....                      | 248      |
| for turret lathes and vertical boring mills.....        | 242      |
| for vertical boring mill.....                           | 251      |
| important points in design.....                         | 242      |
| milling, for angular work.....                          | 214      |
| turret lathe, for different diameters.....              | 246      |
| with means of maintaining accuracy.....                 | 249      |
| Adjustable locating points.....                         | 97       |
| Adjustable stops.....                                   | 92       |
| special types.....                                      | 99       |
| Allowance for grinding and lapping bushings, table..... | 79       |
| Angular and lateral adjustment, fixture for.....        | 217      |
| Angular and straight drilling, jig for.....             | 173      |
| Angular work, adjustable milling fixture for.....       | 214      |
| Arbor for jig bushings.....                             | 85       |
| Attachment for milling on drill jig.....                | 177      |
| Automatic locating devices for drill jig.....           | 151      |
| Bevel-gear blanks, adjustable fixtures for.....         | 248      |
| Bevel-gear fixture with adjustable features.....        | 313      |
| Binders or shoes, dimensions, table.....                | 99       |
| Bolt, hook, for clamping work.....                      | 115      |
| Boring and drill jig, combinations.....                 | 209      |
| Boring bar, supported by jig on one side of hole.....   | 200      |
| using work to guide.....                                | 208      |
| Boring jigs.....  | 195      |
| adjustable.....   | 198      |
| designs.....  | 203      |
| four-part.....  | 206      |
| multiple.....   | 202      |
| of simple design.....                                   | 196      |
| supported on work.....                                  | 199      |
| Boring mills, vertical, adjustable fixtures for.....    | 242, 251 |
| Bosses in pistons, jig for facing.....                  | 181      |
| Box jigs.....   | 15       |
